

1.) Umfang von Prüfungsarbeiten

- Seminararbeiten können auf der Bachelor-Ebene bis zu 15 Seiten umfassen und auf der Master-Ebene bis zu 20 Seiten.
- Bachelorarbeiten sollten ungefähr 30-35 Seiten umfassen, Masterarbeiten etwa 70 Seiten.
- Alle diese Angaben beziehen sich auf den reinen Text, ohne Titelblatt, Inhaltsverzeichnis, Literaturverzeichnis und eventuell vorhandene Datenanhänge.
- Alle Angaben sind Richtwerte, die nicht exakt eingehalten werden müssen. Wenige Seiten mehr oder weniger sind kein Problem. Grundsätzlich gilt aber: Je größer die Abweichungen (vor allem nach oben) sind, desto besser müssen Ihre Gründe sein, die Sie z.B. in der Sprechstunde darlegen können.

2.) Literaturrecherche

- Sie müssen im Rahmen Ihrer Arbeit immer auch demonstrieren, dass sie auf Ihrem Themengebiet die aktuelle Literatur kennen und beherrschen.
- Wichtig sind hierbei vor allem Beiträge aus internationalen Fachzeitschriften mit Begutachtungsverfahren. Dies bedeutet, dass alle veröffentlichten Beiträge dort ein gründliches, anonymisiertes Begutachtungsverfahren durchlaufen haben und daher mit hoher Wahrscheinlichkeit eine gute wissenschaftliche Qualität aufweisen.
- Wenn Sie die Qualität der Zeitschriften selbst einschätzen wollen, hilft Ihnen die Liste des Handelsblatt-Rankings. Die Liste hängt finden Sie im Anhang an diese Hinweise.
- Bücher sowie Beiträge aus Herausgeberbänden können und sollen Sie natürlich auch verwenden. Hier sollten Sie aber darauf achten, dass sie bevorzugt Quellen aus renommierten Wissenschaftsverlagen nutzen.
- Vorlesungsskripten, Vorlesungsfolien u.ä. sind *keine* sinnvollen Quellen.
- Mit Internetquellen, Zeitungen und Zeitschriften sollten Sie *extrem vorsichtig* sein. Diese eignen sich in aller Regel lediglich, um Fakten zu belegen (z.B. Unternehmensnachrichten, politische Entscheidungen, Zitate von Personen des öffentlichen Lebens).
- Nutzen Sie zur Literaturrecherche wissenschaftliche Internetdatenbanken. Insbesondere eignen sich:
 - Business Source Premier / EconLit
 - WISO
 - Web of Science
 - scholar.google.com

Zugang zu den ersten drei genannten Datenbanken erhalten Sie über den Server der Universitätsbibliothek; Google Scholar ist frei zugänglich.

3.) Stil

- Bitte nutzen Sie entweder Times New Roman als Zeichensatz oder, falls Sie in LaTeX schreiben, den cmr-Standardzeichensatz. Standard-Schriftgröße ist 12pt.
- Zeilenabstand: 1,5-fach.
- Ränder: oben, links und rechts je 2,5 cm; unten 2 cm.

- *Seminararbeiten* werden in der Regel an alle Seminarteilnehmer verteilt. Wenn Sie Ihre *Matrikelnummer* für sich behalten wollen, geben Sie diese bitte nicht auf dem Titelblatt Ihrer *Seminararbeit* an, sondern in der E-Mail, mit der Sie die Arbeit einreichen.

- Seminararbeiten werden grundsätzlich *nur* elektronisch als *PDF-Datei* per E-Mail eingereicht. Bachelor- und Masterarbeiten bitte immer *auch* als *PDF-Datei*, zusätzlich zu den von den Prüfungsordnungen vorgeschriebenen gebundenen Exemplaren.

- Im *Literaturverzeichnis* folgen Sie bitte stilistisch den folgenden Beispielen:
 - Für Zeitschriftenartikel:
Chetty, R., J.N. Friedman, T. Olsen & Luigi Pistaferri (2011). Adjustment Costs, Firm Responses, and Micro vs. Macro Labor Supply Elasticities: Evidence from Danish Tax Records. *Quarterly Journal of Economics* 126: 749-804.
 - Für Monographien:
Varian, H.R. (2010). *Intermediate Microeconomics. A Modern Approach*. 8th edition, New York und London: W.W. Norton & Company.
 - Für Beiträge aus Sammelbänden:
Bovens, L. (2009). The Ethics of Nudge, in: **T. Grüne-Yanoff & S.O. Hansson** (Hrsg.), *Preference Change. Approaches from Philosophy, Economics and Psychology*. New York und Berlin: Springer, 207–219.
 - Für Arbeitspapiere in Reihen:
Hillman, A.L. & H.W. Ursprung (2016). *Where Are the Rent-Seekers?* CESifo Working Paper 5833, München: CESifo.
 - Für Arbeitspapiere ohne Reihe:
Hertwig, R. & M.D. Ryall (2016). *Nudge vs. Boost: Agency Dynamics under 'Libertarian Paternalism'*, Arbeitspapier, Toronto: University of Toronto.
 - Internetquellen:
o.V. (2016). *Abenomics: Overhyped, Underappreciated. What Japan's Economic Experiment Can Teach the Rest of the World*.
<http://www.economist.com/news/leaders/21702751-what-japans-economic-experiment-can-teach-rest-world-overhyped-underappreciated>, zuletzt abgerufen am 1. August 2016.
 - Zeitungsartikel:
Ockenfels, A. & M. Schmalz (2016). Die stille Gefahr für den Wettbewerb. *Frankfurter Allgemeine Zeitung* Nr. 175 vom 29. Juli, S. 18.

- Um *im Text* Ihre Quellen anzugeben, nutzen Sie bitte das sogenannte Harvard-System. Hierbei werden die Quellen im Text und nicht in Fußnoten angegeben. Wie genau die Kurzverweise in diesem System aussehen sollen, können Sie im Internet problemlos selbst recherchieren.
- Dies bedeutet *nicht*, dass es verboten ist, Fußnoten zu nutzen. Wenn Sie beispielsweise ergänzende Überlegungen zum Haupttext angeben wollen, dann können Sie dies natürlich in Fußnoten tun.

4.) Wie viele Quellen brauchen Sie?

- Auf diese Frage gibt es *keine Antwort*. Fragen Sie auch besser nicht danach. Sie wollen in Ihrer wissenschaftlichen Arbeit eine kohärente, gut belegte und ausgewogene Argumentationslinie präsentieren. Also brauchen Sie so viele Quellen, wie bei Ihrem Thema nötig sind, um dieses Ziel zu erreichen. Wie viele und welche Quellen das sind, müssen Sie selbst herausfinden. Dies ist – neben dem Schreiben – der Kern *Ihrer* Aufgabe!
- Grundsätzlich ist jede Aussage in Ihrer Arbeit durch eine geeignete Quelle zu belegen.
- Denken Sie daran, dass wir nach den Rahmen-Prüfungsordnungen der BTU gezwungen sind, auf Plagiate mit einer 5,0 zu reagieren. Geben Sie also *alle* genutzten Quellen an und zitieren Sie korrekt!
- Auf der letzten Seite Ihrer Arbeit, nach Literaturverzeichnis und Anhängen, ist folgende Erklärung abzugeben:

Der Verfasser erklärt, dass er die vorliegende Arbeit selbständig, ohne fremde Hilfe und ohne Benutzung anderer als die angegebenen Hilfsmittel angefertigt hat. Die aus fremden Quellen (einschließlich elektronischer Quellen) direkt oder indirekt übernommenen Gedanken sind ausnahmslos als solche kenntlich gemacht. Die Arbeit ist in gleicher oder ähnlicher Form oder auszugsweise im Rahmen einer anderen Prüfung noch nicht vorgelegt worden.

Cottbus, den ... Unterschrift des Verfassers

5.) Wie sieht die Verteidigung bei Abschlussarbeiten aus?

- Die Verteidigungen bestehen aus einer zwanzigminütigen Präsentation Ihrerseits und einer daran anschließenden Diskussion mit den Prüfern.
- Achten Sie darauf, dass Sie nicht mehr als zwanzig Minuten brauchen! Machen Sie nicht zu viele Folien, machen Sie einen Probelauf! Die Präsentation soll die Kernthesen Ihrer Arbeit zusammenfassen.
- Die Diskussion kann sich auf alle Aspekte Ihrer Arbeit beziehen und soll zeigen, ob Sie in der Lage sind, Ihre Arbeit auch gegen kritische Einwände zu verteidigen.

6.) Was sollten Sie noch beachten?

- Fangen Sie rechtzeitig an zu arbeiten. Bei Ihren ersten wissenschaftlichen Gehversuchen werden Sie selten mehr als eine Seite pro Tag in akzeptabler Qualität schreiben können!
- Denken Sie daran, dass in der Regel nur etwa die Hälfte der Zeit dem eigentlichen Schreiben gewidmet sein sollte, der Rest der Literaturrecherche. Damit sind gemeint: das Suchen in Datenbanken, das Lesen von Quellen und das Ordnen der Quellen. Welche Quellen beziehen sich aufeinander? Welche Argumente bauen auf welchen anderen Argumenten auf? Wer übt woran Kritik? Und so weiter.
- Die richtige Reihenfolge für Ihren Arbeitsplan:
 1. Literaturrecherche
 2. Lesen
 3. Ordnen der ersten Quellen
 4. Erstellen einer Gliederung für die Arbeit
 5. Noch mehr Literaturrecherche, noch mehr lesen und Lücken füllen
 6. Schreiben
 7. Noch mehr Literaturrecherche, noch mehr lesen
 8. Weiter schreiben
 9. Zwei Tage Pause machen
 10. Die eigene Arbeit komplett und gründlich lesen und sich fragen, ob immer ein roter Faden erkennbar ist
 11. Schreiben: Ausbesserungsarbeiten
 12. Noch einen Tag Pause machen
 13. Nochmal alles lesen und weitere kleine Korrekturen anbringen
 14. Abgeben und ausruhen
- Denken Sie beim Schreiben daran, dass das vorrangige Ziel einer wissenschaftlichen Arbeit im Studium darin besteht, dass Sie überzeugend demonstrieren, dass Sie
 - sich selbständig in ein Themengebiet eingearbeitet haben
 - sich selbständig einen Überblick über dieses Themengebiet verschafft haben
 - die wichtigsten Argumente der relevanten Beiträge zur Kenntnis genommen und verstanden haben
 - in der Lage sind, mit eigenen Worten verständlich diese Argumente zusammenzufassen, abzuwägen und kritisch zu hinterfragen.
- Wenn Sie noch unsicher sind, versuchen Sie es mit einem der zahlreichen Leitfäden zum wissenschaftlichen Arbeiten, z.B. **M.R. Theisen** (2013). *Wissenschaftliches Arbeiten. Erfolgreich bei Bachelor- und Masterarbeit*. 16., vollst. überarb. Aufl., München: Vahlen.
